CERTIFIED

These wineries are committed to protecting water quality and wild salmon in their local watersheds. Their Salmon-Safe vineyard management practices have been certified by one or more of the following organizations:

liveinc.org

salmonsafe.org

tilth.org

Photos by Donna Lasater. Design by Free Range Advertising

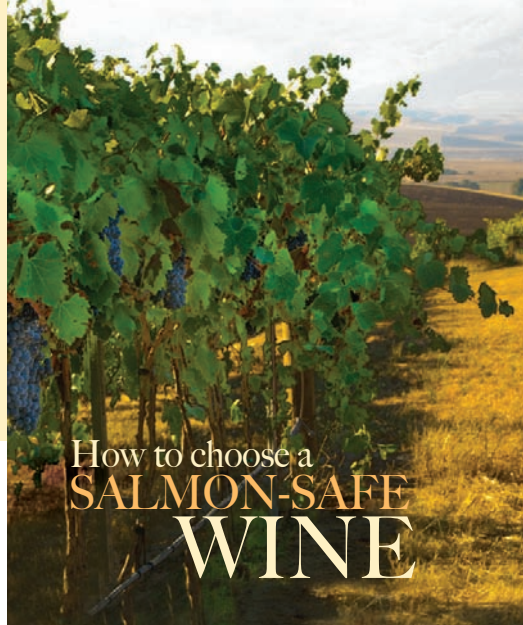

Erosion and run off from vineyards can bring silt into streams, reducing the ability of native salmon to survive. Salmon-Safe vineyards protect and restore salmon habitat by planting trees on streams, growing cover crops to reduce run off, and applying natural methods to control weeds and pests.

So look for the Salmon-Safe label when you shop for wine. Your purchase helps keep rivers clean so salmon can spawn and thrive.

Special thanks to Salmon-Safe partners:
